Workshop Agenda

Purpose:

The Mental Health Services Act is based on the belief that the mental health system can and must be transformed. For the following few years, there are unique opportunities to transform the entire health care system through integration. Federal health care reform and the reorganization of the state administration of mental health and substance use are opportunities for improving services to Californians.

This workshop is designed to provide the Commissioners a forum to talk through the facts and issues presented by changes at the federal and state levels.

Goal:

Informal, informed, and educational discussion of the facts and issues.

Desired Outcomes:

- 1) Create a common baseline of understanding among Commissioners of the facts and issues surrounding the changes proposed and underway at the federal and state levels.
- 2) Discuss the impact of these changes on the Commission as well as on the behavioral health and public mental health system.
- 3) Offer perspectives the Chair, Vice Chair, and Executive Director can relay in conversations with the Administration and Legislature.
- 4) Identify emerging themes and possible future directions.
