*(asterisk) Missing is not applicable (complete dataset)

Notes: Race/Ethnic in every fiscal year is a created variable representing a recode (including a complex series of Boolean logic commands) of concatenated variables Ethnicity_A + Ethnicity_B and Ethnicity + Race1 + Race2 + Race3 + Race4 + Race5.

As of FY 06-07, UCLA received the race/ethnic data in a format that no longer allowed breakout of into eight race and ethnic variables. The data reported in the table above represents post-concatenation. See the report appendix for further discussion.

In FY 11-12 race-ethnic was broken out again into single variables as in FY 04-05 and FY 05-06. The old DIG variables (Ethnicity_A and Ethnicity_B) are not included in the FY 11-12 breakouts for illustrative purposes in order to show the proportion of race-ethnic data that rely upon this variable

Missing in each of the Ethnic/Race variables includes "unknown" response

Age Group in FY 04-05, 05-06 & 11-12 is a created variable, using a combination of date of birth and intake date

Gender Missing (CSI & DCR) includes "Other" in all FY
