**Issue:**

Enclosed for review are the 2003-04 and 2006-07 Disparity Reports. The following reports and charts represent estimates of the prevalence and retention of serious mental illness/serious emotional disturbance in California. These figures are based on CPES Estimates of Need developed by Charles Holzer from the University of Texas. These estimates represent "Targets" and are compared across gender, race/ethnicity, and age to service data obtained through DMH's Client Services Information System (CSI).
