

Data Summary

1) The following charts represent estimates of the prevalence of serious mental illness/serious emotional disturbance in California. These estimates were developed by Charles Holzer from the University of Texas. These estimates represent "Targets" and are compared across gender, race/ethnicity, and age to service data obtained through DMH's Client Services Information System (CSI).

Note:

When examining these charts, it is important to remember that the target estimates for prevalence are based on trended 2000 Census data, therefore the percent differences in target totals compared to actual totals should be reflected upon with caution.

2) The number of clients served was supplied by the DMH's CSI data system. Only clients receiving mental health services during the fiscal year 2006-2007 were counted. A basic principle of the Clients and Service Information system is that it reflects both Medi-Cal and non-Medi-Cal clients, and services provided in the County/City/Mental Health Plan program. This includes all providers whose legal entities are reported to the County Cost Report under the Treatment Program.

Race/Ethnicity

Asian/ Native Hawaiian or Pacific Islander includes:

Chinese, Cambodian, Filipino, Hmong, Japanese, Korean, Asian Indian, Mien, Laotian, Vietnamese,
Other Asian/Pacific Islander, Amerasian, Other Pacific Islander, Native Hawaiian, Samoan, Guamanian

Other includes:

Multiple, Other, Missing, Not Known/Not Reported

CSI Data is provided as of November 18, 2008

**Comparison of Total Clients Served to (Holzer) Targets
By Ethnicity/Race
