NOTE - Description and Coordination of Benefits - Listed in Possible First to Last Cascade Order. The cascade order is not absolute for all payer sources and the sequence of billing order can differ. Accordingly, beginning with the first possible payer the service provider would make the decision if that payer was appropriate to be billed for the rendered services. If not, the service provider would proceed to the next listed payer and thusly continuing until an appropriate payer, or payers, were identified to be billed for reimbursement. Appropriate in this context means consistent with the service provider's priorities and in conformance with federal and State statutes, regulations and program guidance.
